RUMABES

The figures of births and deaths shown in this statement for week ending the 3rd November, 1951, relate to 197 towns with an estimated population of 26,620 thousands. The total number of towns is 254 and their population is 31,142 thousands. Thus 78% of the total number of towns representing 85% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 17,693 and 7,875 representing birth and death rates of 34.6 and 15.4 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 177 towns with an estimated population of 23,692 thousands. Information about Assam, and Bihar, could not be included. The total number of towns is 219 and their population is 26,799 thousands. Thus 81% of the total number of towns representing 88% of the total population is covered. The numbers of births

and deaths recorded in these towns were 16,285 and 7,313 representing birth and death rates of 35.7 and 16.1 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over perthousand of population.

(B) States (Part B).—The data here relate to 20 towns with an estimated population of 2,928 thousands. The total number of towns is 35 and their population is 4,343 thousands. Thus 57% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,408 and 562 representing birth and death rates of 25.0 and 10.0 per thousand of population respectively.

No town recorded a high death rate of 50 or over perthousand of population.
